

What is an Air Cleaner?

Air cleaners are great for removing airborne particles such as dust, dirt, pollen, mold spores, and pet dander. Having an air cleaner installed allows for bigger filters to be used, which are superior to the standard 1" filters that come with your heating and cooling system. These larger filters have more than 9X the filtration area found in 1" filters.

Removes Pollutants

Traps damaging particles in your home such as mold spores, Bacteria, Pollen, dust, & pet dander.

Superior Filtration

The larger filter has more than 9X the filtration area found in your system's standard 1" filter.

Protects your System

Keeps your HVAC system cleaner, improving efficiency & extending its life.

CLEAN COMFORT[®] INDOOR AIR ESSENTIALS

MERV 11

Pollen	✓
Dust/ Lint	✓
Dust Mites	✓
Debris	✓

Aprilaire®

Electronic Air Purifier

- Protects your HVAC system and offers superior filtration performance to 1" panel filters and 4" cartridge filters
- Made of corrosion-resistant heavy gauge galvanized steel
- Comes with one 501 Air Filter.
- Captures and kills particles less than a micron in size (up to 120 times smaller than a human hair)
- Helps prevent dust buildup in your house
- Reduces pet dander and particles that can trigger asthma
- Maximizes the life of your heating and cooling equipment
- Improves energy savings by keeping your HVAC equipment clean
- Enjoy silent operation — none of the "snapping" or "popping" that's common with plate-type EACs.
- 501 MERV 10 Air Filter performs equivalent to MERV 15 when performance tested to AHRI 680 Standard

\$1950

(Includes Installation)
